

# Magnet Programs

Arvida is a staple of strong academics, exemplary core values, fun extra-curricular programs with an all-encompassing family environment. As we navigate through these uncertain times, please note that Arvida is committed to achieve academic success and an overall safe and nurturing school environment.

## Forensic Science

The Forensic Science Magnet strives to create a well-rounded learning experience for our students by infusing the forensic research theme activities throughout their classes and by engaging in the design and operations of multiple meaningful community service led projects. While working forensic cases students are learning fingerprinting, blood typing, hair and fiber analysis. They also have been using their observational skills and have had to practice their critical thinking skills too.

## Global Studies

The Global Studies Magnet Program cultivates global mindfulness and confident leadership in our students as citizens who value environmental conservation. The Global Program provides students with a rigorous S.T.E.A.M. curriculum inside the classroom, a safe and pleasant social experience, and meaningful student led service-learning opportunities for real world connections. Global Studies is an interdisciplinary course of study that encompasses politics, ecology, economics, culture, history, and globalization.
